

Practical Accounting, GST, TDS, Income Tax, Tally Prime & SAP Business One

A comprehensive, industry-focused training programme designed to transform students and professionals into confident, job-ready Accounts and Taxation specialists. This programme covers the full spectrum of modern Indian accounting — from foundational principles to advanced software operations — through real business examples, live demonstrations, and practical case studies.

🎓 B.COM · M.COM · MBA · JOB SEEKERS · ACCOUNTS PROFESSIONALS

Introduction & About the Trainer

This programme bridges the gap between academic theory and industry practice. Students gain hands-on exposure to real-world accounting workflows, statutory compliance, and enterprise software — preparing them for roles in MNCs, CA firms, and corporate finance departments.

Trainer Profile

Over **16 years of corporate experience** in MNC, Expertise in statutory compliance, ERP implementation, and financial reporting. Certified in Tally, SAP, and GST advisory.

Programme Objectives

- Build a strong foundation in accounting principles and double-entry bookkeeping
- Master GST registration, invoicing, ITC, and return filing
- Understand TDS provisions, calculations, and compliance timelines
- Compare Old vs New Income Tax regimes with live computations
- Operate Tally Prime and SAP Business One for end-to-end finance processes

16+

Years of MNC Experience

Hands-on corporate finance roles across industries

6

Core Modules

Accounting, GST, TDS, Income Tax, Tally Prime, SAP B1

100%

Practical Focus

Real business examples, case studies, and software demos

30+

Practical Examples

Journal entries, tax computations, and ERP workflows

Career Opportunities & Skills for Modern Accountants

Career Opportunities in Finance & Accounts

The demand for skilled accounts and taxation professionals in India is growing rapidly. Graduates with practical training in GST, TDS, and ERP software are highly sought after across industries.

- **Accounts Executive / Junior Accountant** — Entry-level role in SMEs and startups
- **Tax Consultant / GST Practitioner**
- **Finance Analyst** — FP&A roles in MNCs and large corporates
- **Audit Assistant** — Statutory and internal audit in Big 4 and mid-size firms
- **Accounts Manager / Finance Controller** — Senior leadership in finance departments

Skills Required for Modern Accountants

Today's accountant must combine technical knowledge with digital fluency and analytical thinking. Employers look for professionals who can interpret data, ensure compliance, and operate enterprise software.

Technical Accounting

Double-entry bookkeeping, financial statements, and cost analysis

ERP & Software Skills

Tally Prime, SAP Business One, Excel, and reporting tools

Statutory Compliance

GST, TDS, Income Tax, PF/ESI, and ROC filing knowledge

Analytical Thinking

Data interpretation, variance analysis, and financial forecasting

Accounting Fundamentals

Accounting is the systematic process of recording, classifying, summarising, and interpreting financial transactions. It serves as the language of business, enabling stakeholders to make informed economic decisions. Understanding the foundational concepts is essential before moving to practical applications.

The Accounting Equation

Every financial transaction affects at least two accounts, keeping the equation in balance. This is the cornerstone of double-entry bookkeeping.

Assets = Liabilities + Owner's Equity
Every debit must have an equal credit. This equation must always remain balanced after each transaction.

Example: A business starts with ₹5,00,000 cash (Capital). It purchases furniture for ₹80,000.
Assets: Cash ₹4,20,000 + Furniture ₹80,000 = ₹5,00,000
Liabilities: ₹0 | Equity: ₹5,00,000 ✓ Balanced

Golden Rules of Accounting

Personal Accounts

Debit the Receiver, Credit the Giver

Example: Paid ₹10,000 to Ramesh → Debit Ramesh A/c, Credit Cash A/c

Real Accounts

Debit What Comes In, Credit What Goes Out

Example: Purchased machinery → Debit Machinery A/c, Credit Cash/Bank A/c

Nominal Accounts

Debit All Expenses & Losses, Credit All Incomes & Gains

Example: Paid salary → Debit Salary A/c, Credit Cash A/c

Accounting Cycle — End-to-End Process Flow

The accounting cycle is a continuous, repeating process that ensures every financial transaction is captured, classified, and reported accurately. Each step builds upon the previous, culminating in financial statements that reflect the true financial position of the business.

Journal Entries, Ledger & Financial Statements

Practical Journal Entry Examples

Journal entries are the first record of any business transaction. Each entry must have equal debits and credits.

Date	Particulars	L.F.	Debit (₹)	Credit (₹)
01/04	Cash A/c ... Dr To Capital A/c (Business started with cash)		5,00,000	5,00,000
05/04	Purchase A/c ... Dr To ABC Suppliers A/c (Goods purchased on credit)		1,00,000	1,00,000
10/04	ABC Suppliers A/c ... Dr To Cash A/c (Payment made to supplier)		1,00,000	1,00,000
20/04	Cash A/c ... Dr To Sales A/c (Goods sold for cash)		80,000	80,000

Ledger & Trial Balance

After journal entries, amounts are **posted to individual ledger accounts**. The ledger shows the running balance of each account. A **Trial Balance** is then prepared to verify that total debits equal total credits before final accounts.

Cash Ledger Example:
Opening: ₹0 | Received Capital: ₹5,00,000 | Paid to Supplier: ₹1,00,000 | Received from Sales: ₹80,000
Closing Balance: ₹4,80,000 (Dr)

Profit & Loss Account

The P&L Account summarises all revenues and expenses for a period to determine **Net Profit or Net Loss**.

Particulars	Amount (₹)
Sales Revenue	80,000
Less: Cost of Goods Sold	(60,000)
Gross Profit	20,000
Less: Operating Expenses	(8,000)
Net Profit	12,000

Balance Sheet

The Balance Sheet presents the financial position at a point in time — Assets, Liabilities, and Equity must always balance.

GST — Goods & Services Tax

GST is a comprehensive, multi-stage, destination-based indirect tax levied on the supply of goods and services across India. Implemented on **1st July 2017**, it replaced multiple cascading taxes (VAT, Service Tax, Excise, etc.) with a unified tax structure. GST operates on the principle of **Input Tax Credit (ITC)**, ensuring tax is levied only on value addition at each stage.

Types of GST

CGST — Central GST

Levied by the **Central Government** on intra-state supplies. Collected when both supplier and buyer are in the same state. Rate is typically half of the total GST rate.

SGST — State GST

Levied by the **State Government** on intra-state supplies. Collected alongside CGST for same-state transactions. Revenue goes to the state where goods/services are consumed.

IGST — Integrated GST

Levied by the **Central Government** on inter-state supplies and imports. Applicable when supplier and buyer are in different states. IGST = CGST + SGST rate combined.

GST Registration Process

Businesses with aggregate turnover exceeding **₹40 Lakhs** (goods) or **₹20 Lakhs** (services) must register under GST. Registration is done online via the GST Portal (gst.gov.in).

01

Apply on GST Portal

Fill Form GST REG-01 with PAN, business details, and bank information

02

Verification & Documents

Submit proof of business, address, and authorised signatory details

03

ARN Generation

Application Reference Number issued for tracking application status

04

GSTIN Issued

15-digit GST Identification Number issued within 3-7 working days

GST Invoice Structure & Input Tax Credit

A valid GST invoice must include: GSTIN of supplier and buyer, HSN/SAC code, taxable value, applicable tax rate, tax amount (CGST+SGST or IGST), and place of supply. **Input Tax Credit (ITC)** allows businesses to reduce their tax liability by the tax already paid on purchases — eliminating the cascading effect of taxes.

GST Return Filing & Reconciliation

GST Return Filing Process

Registered taxpayers must file periodic returns to report sales, purchases, and tax liability. Timely filing avoids penalties and ensures ITC availability.

1 GSTR-1 — Outward Supplies

Filed monthly (or quarterly under QRMP) by the **11th of the following month**. Reports all sales invoices, credit notes, and debit notes issued during the period. Data from GSTR-1 populates the buyer's GSTR-2B for ITC claims.

2 GSTR-3B — Summary Return

Filed monthly by the **20th of the following month**. A self-declared summary of outward supplies, ITC claimed, and net tax payable. Tax payment must be made before filing. This is the most critical compliance return.

3 GSTR-9 — Annual Return

Filed once a year by **31st December** of the following financial year. Consolidates all GSTR-1 and GSTR-3B data for the entire year. Mandatory for all regular taxpayers.

GST Reconciliation Process

GST reconciliation ensures that the data in your books matches the data on the GST Portal. Mismatches can lead to ITC denial, notices, and penalties.

→ Download GSTR-2B

Auto-generated ITC statement from the GST Portal showing all purchase invoices uploaded by your suppliers

→ Compare with Purchase Register

Match GSTR-2B data against your internal purchase ledger in Tally or Excel. Identify missing, mismatched, or duplicate invoices

→ Follow Up with Suppliers

Contact suppliers whose invoices are missing in GSTR-2B. They must file their GSTR-1 for your ITC to appear

→ Reconcile & File GSTR-3B

Claim only eligible ITC in GSTR-3B after reconciliation. Maintain documentation for audit trail

Key Compliance Tip: ITC can be denied if the supplier has not filed their GSTR-3B or paid the tax. Always verify supplier compliance status before claiming ITC.

TDS — Tax Deducted at Source

TDS is a mechanism under the Income Tax Act, 1961, where tax is deducted at the source of income itself. The payer (deductor) is required to deduct a specified percentage before making payment to the payee. TDS ensures steady revenue for the government and reduces tax evasion. TDS provisions have been significantly revised with the introduction of **new Sections 392 and 393** under the simplified tax code.

Important TDS Sections — Old vs New

Old Section	New Section	Nature of Payment	Rate (Individual)
Sec 194C	Sec 393	Payment to Contractors	1% / 2%
Sec 194J	Sec 393	Professional/ Technical Fees	10%
Sec 194I	Sec 393	Rent Payment	10%
Sec 194A	Sec 393	Interest Other than Securities	10%
Sec 194H	Sec 393	Commission / Brokerage	5%
Sec 192	Sec 392	Salary Payment	Slab Rate

 **Note:** New Sections 392–393 consolidate and simplify TDS provisions. Rates may vary based on payee status (Individual, Company, HUF) and whether PAN is provided.

TDS Calculation — Practical Examples

Example 1 — Professional Fees (Sec 194J / 393(2)):
Company pays ₹1,20,000 as professional fees to a CA.
TDS @ 10% = **₹12,000**
Net payment to CA = ₹1,08,000 | TDS deposited to Govt = ₹12,000

Example 2 — Contractor Payment (Sec 194C / 393(1)):
Company pays ₹5,00,000 to a contractor for work.
TDS @ 2% (for companies) = **₹10,000**
Net payment = ₹4,90,000 | TDS deposited = ₹10,000

Example 3 — Rent Payment (Sec 194I / 392(3)):
Company pays ₹3,00,000 annual rent to landlord.
TDS @ 10% = **₹30,000**
Net rent paid = ₹2,70,000 | TDS deposited = ₹30,000

TDS Compliance Timeline

Income Tax — Old vs New Regime & Salary Computation

Old Tax Regime vs New Tax Regime

Taxpayers can choose between the Old Regime (with deductions) and the New Regime (lower rates, fewer deductions). The choice depends on individual investment patterns.

Feature	Old Regime	New Regime
Tax Slabs	Higher rates	Reduced rates
Sec 80C Deduction	Up to ₹1,50,000 ✓	Not Available
HRA Exemption	Available ✓	Not Available
Standard Deduction	₹50,000 ✓	₹75,000 ✓
Best For	High investors	Low investors

Salary Tax Computation — Practical Example

Employee: Mr. Sharma, Age 35, CTC ₹10,00,000 p.a., residing in Mumbai (Metro), Old Regime

Component	Amount (₹)
Basic Salary	5,00,000
HRA Received	2,00,000
HRA Exempt (50% of Basic)	(2,50,000) → Actual exempt ₹2,00,000
Standard Deduction	(50,000)
Sec 80C (PPF + LIC)	(1,50,000)
Taxable Income	5,00,000
Tax @ 5% (₹2.5L–₹5L)	₹12,500
Health & Education Cess 4%	₹500
Total Tax Payable	₹13,000

✓ **Result:** Effective tax rate is only **1.3%** of CTC due to exemptions and deductions under the Old Regime. Under New Regime, tax would be higher without these benefits.

Tally Prime, SAP Business One & Integrated Case Study

Tally Prime — Overview & Workflow

Tally Prime is India's most widely used accounting software, trusted by over 10 million businesses. It handles GST compliance, inventory, payroll, and financial reporting in a single platform.

01

Create Company

Set up company with GST details, financial year, and base currency

02

Create Ledgers & Stock Items

Define party ledgers, expense heads, and inventory items with HSN codes

03

Record Vouchers

Purchase, Sales, Payment, Receipt, and Journal vouchers with auto GST calculation

04

Generate GSTR & Reports

Export GSTR-1, GSTR-3B data, Trial Balance, P&L, and Balance Sheet directly

SAP Business One — Finance Process Flow

SAP Business One is a comprehensive ERP for SMEs, integrating finance, sales, purchase, and operations. Key finance modules include A/P, A/R, General Ledger, and Costing.

A/P Invoice

Record vendor invoice with GST, approve workflow

Outgoing Payment

Process payment, auto-post to GL and bank reconciliation

Financial Reports

Real-time P&L, Balance Sheet, and cash flow dashboards

Integrated Case Study — End-to-End Business Transaction

Scenario: XYZ Traders (GST registered, Mumbai) purchases goods from ABC Suppliers (Delhi) and sells to a local customer.

Step 1 — Purchase Entry (IGST)

Purchase ₹1,00,000 + IGST 18% = ₹1,18,000
Tally: Purchase Voucher →
Auto IGST ₹18,000
ITC of ₹18,000 available in GSTR-2B

Step 2 — Sales Entry (CGST+SGST)

Sale ₹1,50,000 + CGST 9% + SGST 9% = ₹1,77,000
Output Tax: ₹27,000
Net GST Payable: ₹27,000 – ₹18,000 (ITC) = **₹9,000**

Step 3 — TDS on Professional Fees

Paid ₹50,000 legal fees →
TDS 10% = ₹5,000
Net payment ₹45,000 |
Deposit TDS by 7th next month

Step 4 — File Returns & Review Reports

File GSTR-1, GSTR-3B in Tally/SAP B1
Generate P&L, Balance Sheet, and Cash Flow
Reconcile GST, TDS, and Bank statements

✔ **Learning Outcome Achieved:** Students now understand the complete flow — from recording transactions, computing GST and TDS, filing returns, to generating financial statements using industry-standard software.

THANK YOU
